

To,  
All IITKAA members.

There have been several observations made by some of the alumni association members. I have received petitions questioning the process of elections via web, and considering nomination, seconding and acceptance as separate process and addition of two more dates for seconding/acceptance and withdrawal. Since, these issues needs discussion and some amendments in bye-laws. I have decided that the election process shall continue as it is. In the AGM, the discussion on all these issues shall be made. **The results of the elections shall be disclosed by me only after AGM will accept the process of election, by the method as prescribed in the constitution and bye-laws.** In case AGM does not accept the current process of elections, necessary further action shall be taken as per the directions of AGM.

I have submitted all the received comments, observations and petitions to Secretary for discussion in AGM.

ynsingh  
Election officer.
